Business Value

Today joint customers can confidently use Innovate Software Consulting Inc Ltd's products together with engineered systems and operating systems of Oracle to enjoy improved performance and manageability. Participation of our organisation in the Oracle Exastack Ready program reflects our commitment to delivering a world-class customer experience with a high performance, high capacity, industry leading database infrastructure. This is a key component of e-Enterprise Resource Planning (e-ERP) product providing that experience and scaling our infrastructure capabilities as our customers' data volume, variety, and intelligence requirements rapidly expand.

Why Oracle?

The Oracle Exadata Database Machine delivers extreme performance and is the ideal database platform for OLTP applications, data warehouses as well as the varied and unpredictable workloads of cloud computing. It is a complete package of servers, storage, networking, and software that is massively scalable, secure and redundant.

Oracle Exalogic Elastic Cloud is hardware and software engineered together to provide extreme performance, reliability and scalability for Oracle, Java and other business applications, while delivering lower TCO, reduced risk, higher user productivity and one-stop support.

Built using industry-standard hardware, market-leading business intelligence software and in-memory database technology, Oracle Exalytics is an optimized system pre-integrated to reduce the cost and complexity of an organization's IT infrastructure, while dramatically increasing productivity and performance.

Oracle SuperCluster is the world's most efficient multi-purpose engineered system, delivering extreme efficiency, cost savings, and performance for consolidating mission

critical applications and rapidly deploying cloud services.

Oracle VM 3, the latest release of Oracle's x86 server virtualization solution, is suitable for all datacenter workloads, enabling companies to move beyond server consolidation and to focus on accelerating and simplifying application deployment and management.

Oracle Solaris 11, the first cloud OS, brings the reliability, security and scalability of the #1 enterprise OS to the cloud, allowing customers to run their most demanding enterprise applications in private, hybrid, or public clouds.

Oracle Linux, with its default Unbreakable Enterprise Kernel, brings the latest Linux innovations to market, delivering extreme performance, advanced scalability, and reliability for enterprise applications, at a lower cost.

For additional information about partnering with Oracle, please contact OPBC-WW_WW@oracle.com or visit oracle.com/partners.
